About Sigma Business Solutions Inc.

Sigma Business Solutions Inc. is the premier partner of PBS Software GmbH, with the largest client base in North America.

Sigma introduced the software in the region, and represent, implement and support solutions and services as part of our SAP archiving process.

At Sigma we have completed numerous installations successfully

we have the knowledge and expertise to implement this solution very effectively, on time and within your budget. We also work jointly with PBS Software in developing new modules, perform quality control and support clients in North America.

About PBS

PBS Software GmbH is a leading provider for SAP add-on software in the areas of data archiving, extraction, and storage as well as system closing and has been known to be an expert on complex, integrated data accesses for many years.

PBS's focus "is the seamless and fast data access to *all* enterprise data regardless of whether it was stored in an online, archived or nearline format. We concentrate on the development of pragmatic and innovative ILM tools that help SAP customers reduce their operating costs while at the same time enabling very high levels of user satisfaction"

Features of the PBS Archive Add-Ons Software for SAP Systems

Sigma Business Solutions Inc. possess the expertise in IT consulting, packaged solution implementation, product / application development, network / systems and project management skills to provide clients with an unparalleled proposition for achieving competitive advantage in the economy

- A software solution developed specifically for providing access to archived SAP data
- A ready to run solution that required no additional development to provide access to archive data
- Requires no special hardware
- Very quick installation
- Provides access to archived data, data in the SAP data base or both using standard SAP methods such as menu paths, transaction codes and ABAP reports
- Provides full drill down to the lowest level of detail and document flow
- Provides integration between SAP modules and between archived and current data
 - **Example:** If you archived a sales order but you did not archive the related accounting document or delivery document the links are fully maintained and you can access any of those documents by the click of a mouse
- Allows storage of archived data on magnetic disk and/or external devices which are all outside of the SAP database
- Archived data is compressed resulting in significant savings in storage space
- Practically no user training

Increasing YOUR ROI, With A Cost Effective Solution

Testimonials

University of Nebraska The University of Nebraska selected Sigma Business Solutions Inc. as the implementation partner to implement the PBS Archive Add-On™ software for our archiving project. Sigma Business Solutions Inc. was very professional in all aspects of our project, from the initial presentation through the implementation, and went the extra mile to ensure that the solution was implemented in record time and at minimal cost. We were also very satisfied with the on going support and quick response to any issues that arose.

Scott Pyle

SAP Basis Administration Team Lead
